2018-19**

QUESTIONS

Exam Topic 1 – Fitness and Body Systems

1hr 45mins 90 Marks

Wednesday 15th May 2019 – AM

Sections to revise:

Functions of the musculo-skeletal system
Location of 20 bones
Classification of bones
Classification of joints
Range of movements at joints
Role of ligaments, tendons & cartilage at joints
Classification of muscles
Location of 12 muscles
Movements produced at each muscle
Antagonistic pairs
Muscle fibre types
Short term effect of exercise on the musculo-skeletal system
Long term effect of exercise on the musculo-skeletal system
How the musculo-skeletal system allows participation in sport

Functions of the cardiovascular system
Labelling of the heart
Blood flow
Structure of arteries, veins and capillaries
Vascular shunting, vasoconstriction & vasodilation
Components of blood and function of each
Composition of air
Labelling of the respiratory system
Gases exchange
Aerobic and anaerobic exercise
Short term effect of exercise on the cardio-respiratory system
Long term effect of exercise on the cardio-respiratory system
How the cardio-respiratory system allows participation in sport

Lever systems
Mechanical advantage & disadvantage
Planes of movement

Components of fitness
Fitness testing
Principles of training
Methods of training
Warm-Up & cool-Down
PAR-Q

Injury Prevention
Sporting injuries & treatment

Drugs

Definitions

Musculo-Skeletal System

Skeletal System

What are the 5 functions of the musculoskeletal system?

Can you point to the 20 bones in your body you need to know for your exam?

What are the 4 classification of bones?

What are the regions of the vertebrae column and how many bone are in each?

What is a joint?

What is the role of the 3 connective tissues at a joint?

Can you give examples of the 4 types of synovial joints?

Can you name the 8 range of movements possible at synovial joints and give a sporting example?

Which movement is possible at each synovial joint?

Musculo-Skeletal System

Muscular System

What are the 3 types of muscle?

What are the 3 functions of the voluntary muscular system?

Can you point to the 12 voluntary muscles in your body you need to know for your exam?

Can you describe the movement produced by each muscle?

Can you name 4 antagonistic pairs and explain how they work together?

What are the 3 muscle fibres types and give an example of which sports they would suit?

Can you name 1 negative and 1 positive for the 3 different muscle fibre types?

Can you name the 3 short term effects of exercise on muscles?

Can you name the 3 long terms effects of exercise on the musculo-skeletal system?

What is weight bearing exercise?

Why is diet so important to the skeletal system?

Cardio-Respiratory System

Cardiovascular System

What is the cardio-respiratory system?

What is the cardiovascular system made up of?

What are the functions of the cardiovascular system?

What is blood pressure?

Can you explain the difference between Systolic and Diastolic pressure? (DR SC)

What are the four valves in the heart? (Tri before you Bi)

Which two are known as the semi-lunar valves?

Which is the differences between the inferior and superior vena cava?

What is the name of the blood vessel that supplies the body with oxygen?

What are the differences between veins, arteries and capillaries?

Can you discuss the flow of blood starting at the vena cava?

Can you explain blood shunting during exercise?

What are the four components of blood?

What are the 4 short term effects of exercise on the cardiovascular system?

What are the 9 long term effects of exercise on the cardiovascular system?

Can you explain some effects lifestyle can have on the cardiovascular system?

What is 'Cardiac output'?

What is 'stroke volume'?

Cardio-Respiratory System

Respiratory System

What are the main functions of the respiratory system?

What is 'Tidal Volume'?

What is 'Vital Capacity'?

What are Alveoli and what do they do?

What is the difference between aerobic and anaerobic respiration?

What are the energy equations?

What is Lactic acid?

What is Oxygen debt?

What are the short term effects of exercise on the respiratory system?

What are the short term effects of exercise on the respiratory system?

What is VO₂ max?

What is diffusion?

Movement Analysis

Lever Systems

What are the 3 types/classes of levers in the body and give an example of each?

Can you draw the three different types/classes of lever?

Can you state the mechanical advantage provided by a 2nd class lever?

Planes and Axes of Movement

Can you name the 3 planes of movement in the body?

Can you name the 3 axes in the body?

Which is the correct description of the sagittal plane?

Can you describe a movement in the following planes and axis?

Movement in the sagittal plane occurs around which axis?

Movement in the frontal plane occurs around which axis?

Movement in the transverse plane occurs around which axis?

Fitness Training

What is the definition of Fitness?

What is the definition of Health?

What is the definition of Exercise?

What is the definition of performance?

What does HRE stand for?

Can you list the 5 components of HRE and give a full definition for each?

What does SRF stand for?

Can you list the 6 components of SRF and give a full definition of each?

Can you choose a sport & list the 3 most important components of HRE & SRF for it, and explain why?

Think of the areas of HRE and SRF. Can you think of a fitness test you could use for each of these areas and explain it?

What is a test protocol?

What are the 5 principles of training? Can you give a definition and example of each?

What does FITT stand for?

Can you explain each element?

Why would you use the FITT principle? (linked to progressive overload)

List the 6 methods of training studied?

Can you give at least 2 advantages of each method of training?

Can you name and explain the 5 different exercise classes?

Why would you use different methods to train?

Think of the methods you use most regularly within your own sport, can you justify why you use them?

What are the 4 stages of designing an effective exercise programme?

What does PAR-Q stand for and why is it used?

Why do you set SMART goals in your training?

What does SMART mean?

Can you describe each area of SMART?

Why do we set SMART targets?

What are the three areas of an exercise session?

Why do we warm-up?

Why do we cool-down?

Can you explain Aerobic and Anaerobic fitness?

Can you explain the following?

Heart rate:

Resting Heart rate:

Working Heart rate:

Maximum Heart rate (MHR):

Target Heart rate / Target Zone:

Recovery Rate:

Injury Prevention & Treatment

Name and explain the 6 rules for preventing injury in sport.

What are the types of injuries which can occur during sport and their symptoms?

Name the three soft tissue injuries which can occur in sport.

What is the correct treatment for soft tissue injuries?

Drugs

Can you name the 6 Performance Enhancing Drugs & explain the effects of each?

What is a Masking Agent?

What is Blood Doping?

Why do people risk it all by taking drugs? (3 pressures)

Exam Topic 2 – Health and Performance

1hr 15mins 70 Marks

Friday 17th May 2019 – PM

Sections to revise:

How participation in sport can promote physical, social and emotional health
Impact of fitness on well-being
Lifestyle choices – positives and negatives effects
Effects of a sedentary lifestyle

7 Categories of a balanced diet
Macro and micro nutrients
Optimum weight
Energy balance
Hydration

Classification of skill
Types of guidance
Types of feedback
Mental preparation for performance

Engagement and participation rates

Commercialisation of sport

Sporting behaviour and sporting deviance

DIET

Can you list the 7 parts of a balanced diet?

What is the primary function of each category of food?

Which are macro and micro-nutrients?

What do we mean by a 'balanced diet'?

What are the two types of carbohydrate and what do they do?

What are the two types of fat and what foods are included in each?

Can you name the 4 deficiency diseases caused by a lack of vitamins or minerals?

Can you name 3 reasons why it's important to stay hydrated?

When are the 3 times we should hydrate when exercising?

What is carbo-loading and why is it important?

What is Optimum weight and what factors can affect it?

Can you describe the energy balance and explain how we loss, maintain and gain weight

Can you define Obese?

Can you define Overfat?

Can you define Overweight?

Can you explain how you can be overweight but healthy?

What is Body mass index (BMI)?

What is vascular shunting?

Benefits of Participation

Can you list as many effects of exercise on health as you can?

Can you divide those reasons into physical, emotional and social?

What is Aesthetic Appreciation?

How can you increase your self-esteem through sport?

What are the impact of fitness on well-being?

Lifestyles Choices

What are lifestyle choices?

What are the 5 lifestyle choices that affect our health?

How do these choices affect our health?

What affects can excess alcohol have on your health?

What affects can excess alcohol have on sports performance?

What affects can smoking have on your health?

What affects can smoking have on sports performance?

Factors Affecting Participation & Sedentary Lifestyle

What are 6 factors which affect participation?

What are the barriers to participation?

What is a sedentary lifestyle?

Can you list the long term health problems linked to a sedentary lifestyle?

What is diabetes?

What is Coronary Heart Disease?

What is Depression?

Commercialisation

What is commercialisation?

What 3 things make up the golden triangle of sports commercialisation?

Can you name 2 advantage and 2 disadvantages of commercialisation on sport?

Can you name 2 advantage and 2 disadvantages of commercialisation on players

Can you name 2 advantage and 2 disadvantages of commercialisation on spectators

Can you name 2 advantage and 2 disadvantages of commercialisation on sponsors?

Sporting Behaviour

What is Deviance?

What is Positive Deviance? Example?

What is Negative Deviance? Example?

What is Sportsmanship? Example?

What is Gamesmanship? Example?

Classification of Skill

What are the 3 different skill continuums?

Can you define the term 'Complex Skill'?

Which one of the following is an Open Skill?

Can you define the term 'High Organised Skill'?

Types of Practice

Can you name the 4 different types of practice?

Can you define the term 'Massed Practice'?

What type of performer is distributed practice most suited to and why?

Can you define the term 'Fixed Practice'?

Types of Guidance

Can you name the 4 types of guidance?

Can you define the term 'Manual Guidance'?

Can you list 3 types of visual feedback a coach may use?

Is verbal feedback more suitable for novice or experienced performers and why?

Can you state the type of guidance being used if a coach uses a tumbling belt to help a performer learn to somersault in Trampolining?

Types of Feedback

Can you list the 4 types of feedback?

Can you describe the term 'Extrinsic Feedback'?

Can you describe the term 'Terminal Feedback'?

Which one of the following is the most appropriate statement about concurrent feedback?

Mental Rehearsal

Can you define the term 'Mental Rehearsal'?

Which one of the following is a correct statement about mental rehearsal?
