Science revision resources for year 11 students

To support your child's learning at home, the science department provide both core questions and revision guides.

Core Questions

Core questions are a list of questions provided with answers that you can test your child with at home. Each child in every year group has been given a copy of the core questions for this academic year via their workbooks.

Core questions aid learning by ensuring that your child does not forget the knowledge they have been taught in lessons. Practice learning these questions embeds knowledge into their long-term memory. This has a positive impact on a student's confidence and enables them to stretch themselves with the more challenging aspects of our courses. In recent years we have seen a higher demand for recall in the GCSE exams. By learning core knowledge, our students are more confident and comfortable in exams, which in turn enables them to perform better.

We would recommend testing your child with 10 questions a week on the topics they are currently studying in each of the three sciences.

You can find out what topics your child will be studying and copies of the core questions on the school's website, in the science department section under the learning & subjects tab, and Aylsham High Science - KS4 (google.com).

Revision guides

We find that some students like to also have a revision guide at home to support homework or to improve their confidence with content being taught in school.

We offer Edexcel CGP revision and practice at cost price, which can be purchased through ParentPay until 11th October.

Please refer to the table overleaf to identify which revision guide to purchase.

Director of Business and Community Strategy: Mrs J Tuttle

Class	Suggested revision guide
11 C/D/E/F/G/H/I Combined Science	GCSE Combined Science Revision Guide (The correct tier will be ordered upon discussion with teachers)
11 A/B Separate Science	GCSE Biology Revision Guide GCSE Chemistry Revision Guide GCSE Physics Revision Guide You can order just the subjects you would like or all three.

I hope this has been useful information for you, however if you need further support or information please head to the learning & subjects tab, [Aylsham High Science - KS4 \(google.com\)](#) or email myself directly cnicholls@aylshamhigh.norfolk.sch.uk.

Many thanks with your continued support.

Yours sincerely

Charlene Nicholls
Head of Science
